

## Ohio Medicaid Budget Variance Report – April 2021

The Ohio Medicaid Budget Variance Report provides a monthly review of actual Medicaid expenditures compared to disbursement estimates for FY21. Medicaid enrollment and spending estimates included in this report are based on updated projections made in July at the start of fiscal year 2021 and after the onset of the COVID-19 pandemic. As a reminder, SB 310 incorporated these higher projections and was passed by the General Assembly in December 2020. SB 310 authorized federal spending increases above HB 166, the original budget. The current estimate of state share of ALI 651525 is lower than the original as-passed budget. Enrollment has continued below the revised estimates, but higher than original budget estimate throughout the fiscal year, driving significant negative spending variances. Additionally, these projections assume the receipt of additional federal reimbursement, associated with the federal pandemic response, only for the July-December period, whereas the additional federal reimbursement has now been authorized for the remainder of the year. This explains many of the significant month-to-month Medicaid spending variances reflected in this report. Through April 2021, the total variance of the Medicaid Program was \$2.2 billion (7.8%) under the \$28.0 billion estimate. Underspending in SFY 2021 compared to the disbursement estimate has been factored into the Executive Budget forecast for the SFY 2022-23 budget process.

- The estimates contained in this report were made in the early days of the COVID-19 pandemic when economic outlooks were more pessimistic than the actual impact turned out to be. As a result, the depth of insight gained from these monthly reports are more limited than variance reports released during non-pandemic years.
- Managed care spending is under estimate by \$1,660.4 million (8.7%) year to date. Spending was under estimate for the month due to lower than anticipated caseload. The variance increased starting in January due to CY21 rates coming in lower than projected.
- Fee for service and other payments are under estimate by \$419.5 million (6.4%) year to date. FFS spending was under estimate for the month due to lower than anticipated caseload. The DODD services line item was over estimate for the month due the timing of a cost report settlement that was estimated for March, but was paid in April.
- Medicare Premium Assistance Payments were under estimate for the month by \$6.2 million (5.9%). The variance is due to lower than projected Part D expenditures because of the extension of enhanced FMAP through CY21.
- Administration is under estimate year to date due to lower than estimated IT-related expenses. This is mainly due to timing of payments. Almost all the variance is outside of GRF.
- Variance in ALI 651525 is disproportionately state share, a trend which started in January. The disbursement estimate assumed enhanced FMAP through December of 2020, but states have been informed that it will continue through the end of CY2021.
- The waterfall graph below indicates the sources of the budget variance through April:

Total [caseload](#) was under estimate for the month of April by 358,910 (10.1%). Covered Families and Children (CFC) enrollment was under projections by 240,787 (11.9%), Expansion enrollment was under by 98,286 (11.2%) and ABD/MBIWD/Dual enrollment was under estimate by 19,257 (3.7%). Caseload has increased by about 405,000 (14.5%) since February 2020, largely due to the suspension of routine terminations as part of the enhanced FMAP maintenance of effort requirement. The increase from March to April was about 21,300 (0.7%).
